Talking to Blockheads

Sometimes Arguing Means Losing

CONTENT

Rules for smart resistance

Everybody saw Donald Trump pulling faces behind Hillary Clinton's back. We've all witnessed a boss brush aside well-reasoned objections with a short putdown or a colleague using grand gestures to rule the meeting room. All of these are clear signals of power. Discussion is never just about the power of argument—some people seem to get by without any reasoned arguments at all. But there is a way to resist such people.

Peter Modler, a renowned coach and bestselling author, analyses situations in business and politics in which bullies seem to have the upper hand. And he uses these examples to develop ten concise rules for standing up to them. Beat the blockheads by turning their own weapons against them: It's all a matter of technique!

- **How to beat the blockheads and show you won't be pushed around!**

"Modler has become the go-to expert in matters of interpersonal conduct in professional situation. The curious thing is that he seems almost to be alone in Germany with his knowledge." Stern Online

AUTHOR

Peter Modler has been running his own consultancy in Freiburg, Germany since 1998. He specializes in corporate restructuring and coaching. More than 2.000 executives have participated in his workshops and training. He reached a wider audience as the inventor of *Arrogance Training® for Woman Leaders*. His last book was *The Friendly Foe* (2017).

Oilquake

How America is Jeopardizing our Future

Full speed ahead—against the world

While the rest of the world is discussing the ins and outs of climate change, Donald Trump is leading the world's largest economy into a new age of oil, creating dirty facts where others just talk. Vast tracts of land from Alaska to the Gulf of Mexico are being turned into industrial wastes, and the consequences are global in scale. America has won the battle for oil and is pursuing its aims with little regard to old alliances. Heike Buchter, an expert on the global economy and financial markets based in New York, has visited the scenes of this battle to see for herself what American energy dominance means for us and our environment—but also for our security. She reveals how Wall Street is driving the boom and how fracking for oil is reshaping the world.

The Five-Hour Revolution

Want Success? Rethink Work!

Imitation recommended!

A 25-hour working week on full pay? No way! Or so you might think. The entrepreneur Lasse Rheingans gave it a try and stuck with it. The trial was a resounding success: productivity went up, as did employee satisfaction. His staff proved more creative and productive. Rheingans explains why the five-hour day is the future, but also warns against the pitfalls: How to convince customers, for instance, who expect to reach you at all times? How to keep colleagues talking and exchanging ideas when there's no time for office banter? Rheingans himself had many hurdles to clear. But after all, he is more convinced than ever that if we want to be successful in the future, we need to rethink work.

The Loop Approach

How to Transform Your Organization from the Inside Out

CONTENT**Going round in circles to get ahead ...**

What sounds like a contradiction at first turns out to be the secret of success for established companies. For years now managers and consultants have been debating the issue of how to make long-standing companies future-proof. That is especially difficult for organizations that have become a bit stiff in the joints and are now expected to move nimbly and be agile in a VUCA world. After all you can't teach an old dog new tricks—or can you?

Those who have tried have often used randomly picked tools and methods from the world of start-ups within big corporate environments. Most of them have failed spectacularly because they lacked the necessary framework for a company-wide roll-out. The Loop Approach gives you just that. It presents a systematic approach based on constant iteration which slowly but surely will move that mountain of a business and set it rolling towards a brighter future. The Loop Approach has been successfully tried and tested at corporate giants such as *Audi*, *Deutsche Bahn*, and *Telekom*.
